

TRUEGLOSS[®] BOARDS

Best-in-class high-gloss panels with world's first scratch-resistant & no-orange-peel effect high-gloss PET film. Due to revolutionary lacquer technology and advanced continuous lamination process, the TrueGloss[®] panels offer superior flatness compared to other high-gloss PET panels, which have many granular waves and are not scratch resistant. The TrueGloss[®] panels are a preferred alternative to high-gloss lacquered & laminated boards and the perfect choice for vertical applications in interior areas.

Our TrueGloss[®] panels offer not only outstanding technical features, but also extremely low price that makes them ideal for HoReCa and shop-fitting projects as well as in residential projects.

SURFACE	PET film
BOARD DIMENSIONS	2800x1300 mm
BOARD THICKNESS	18,5 mm (1-sided) 18,7 mm (2-sided)

ADVANTAGES

SCRATCH RESISTANT

World's first high-gloss PET film with no scratches from fingernails or regular use

CHEMICAL RESISTANT

Surface is chemical and stain resistance making it ideal for kitchen fronts

SUPERIOR GLOSSINESS

Great gloss effect that perfectly reflects the surrounding environment

NO ORANGE PEEL EFFECT

High surface quality & advanced production process mean no orange peel effect

UV RESISTANT

Increased UV resistance means the surface will remain the same in time

WATER RESISTANT

Water cannot penetrate the core through the surface

EASY TO CLEAN

Scratch and chemical resistance of the surface means the board is very easy to clean with common detergents

ANTIBACTERIAL

Surface has improved antibacterial properties for hygienic everyday use

BETTER ALTERNATIVE TO LACQUER

Enhanced technical characteristics and superior glossiness coupled with lower price make it ideal alternative to lacquer
